

PROFILES OF TRAINERS FOR THE COURSE ON COURSE ON “METHODS FOR RESEARCH ON AGRICULTURAL MARKETS”

Nicholas Minot- is the Deputy Division Director in the Markets, Trade and Institutions Division of the International Food Policy Research Institute (IFPRI). He joined IFPRI in 1997 and has carried out research on agricultural trade and markets, including studies of rice policy in Vietnam, market reforms in Benin, wheat policy in Egypt, spatial patterns of poverty in Vietnam and Laos, the relationship between poverty and market access in Tanzania, income diversification in Vietnam and India, contract farming in China, horticultural markets in Indonesia, value chains in Africa, price transmission from global to local markets, and the impact of market information on farmers in Ghana and Uganda.

Before joining IFPRI, he received his Ph.D. in agricultural economics from Michigan State University, taught at the University of Illinois in Urbana-Champaign, and worked as a policy adviser in Zimbabwe and as a survey analyst in Rwanda. He also carried out research in Bolivia, Peru, Paraguay, Cameroon, and Laos.

Mila Sell- is a Senior Specialist and Research Scientist at the Natural Resources Institute Finland (Luke). She joined Luke (formerly MTT) in 2009 and is currently working as Programme Coordinator for the Finnish funded FoodAfrica Programme, which is a research for development programme aiming to improve food and nutrition security in Africa, through increasing food production and improving food safety, diets, and market access. Sell's own expertise relates to multi-disciplinary research, pedagogics and participatory research methods, with a special focus on women empowerment in agriculture. She has a long of experience in program development and coordination, teaching, and fieldwork in several African countries. Luke is Finland's national research and expert organization that works to advance bioeconomy and the sustainable use of natural resources globally.

Jarkko Niemi - is a research professor and agricultural economist at Natural Resources Institute Finland (Luke). He also holds a title of docent (i.e. adjunct professor) at University of Helsinki. His research focuses on identifying economically sustainable production methods, technologies, policies and business solutions in the food sector. Dr. Niemi has over 15 years of experience in applied economic modelling, with particular expertise in modelling livestock production processes. He participates in several large international projects, including FoodAfrica, where he is a member of the programme management team.
